

## ACT Prep Workshops

We have listed the ACT national test dates in 2017-2018 below. To help students prepare to take the ACT, Wichita State University offers an ACT test preparation workshop several times each year, and would like to invite high school students to register for and attend one of the workshops. Each workshop will provide information and samples for all four sections of the exam – English, Math, Reading and Science.

## ACT Math Workshop

Due to requests for a workshop that concentrates only on the Math section of the ACT, the WSU Counseling and Testing Center will offer two ACT Math Workshops during the 2017-2018 academic year. Students are encouraged to attend the full ACT Prep Workshop before the Math workshop, if possible, because the two workshops will not cover the same material. Students may bring difficult sample ACT problems or their questions to the math workshop, including questions about how to do math problems quicker during the test. Also, a short practice test for the math section will be included in this session after samples are explained.
