WHERE TRADITION MEETS INNOVATION

USD 448 Inman Bond Project Update
August 22, 2022

The bond project continues in the design stage. Final drawings from Landmark Architects are expected in September. Hutton, working with the district and Landmark, will request bids on individual scopes of work within the project by the end of September. The team expects to break ground in October on the south end of the property. Work will begin on the football field/track area only after the completion of the 2022 football season.

As stated in the months leading up to the bond election, the mill levy will increase 3.250 mills resulting in a total bond and interest mill levy of 11.250 mills.

Companies interested in bidding on the project are instructed to watch for bid package advertisements. Once available, Hutton and the district will post information in local newspapers, on the district's website, on the USD 448 Inman Bond Project Facebook page and on the school district's official Facebook page.
